About Me

I'm a senior in high school, but more importantly, a self-taught web developer. I'm passionate about creating solutions to real-world problems and setting higher standards for the software we interact with.

Experience

▶ Web Developer @ Brookfield Learning Center

brookfieldlearning.com

📅 Sep. 2021 - Present • 📍 Brookfield, CT

Built an appointment scheduling and attendance tracking system with a dashboard for administration. Used **Next.JS** and **TailwindCSS** for the frontend, with **Supabase** for the backend. I ensured that it was performant, fast, and powerful without sacrificing a good-looking design.

Projects

▶ Meet Me In The Middle

meetmeinthemiddle.ilioslabs.dev

📅 Oct. 2022

A simple, beautiful website to help friends or colleagues find perfect meeting spots between everyone. Uses the **Google Maps APIs** on the backend and **Next.JS** and **TailwindCSS** for the frontend.

▶ BuilderBook

book.buildergroep.com

📅 Nov. 2022 - Jan. 2023

A collection of various resources for young builders and founders. Powered by the Notion API with **Next.JS** and **TailwindCSS** to create a clean look. Earned #1 Education Product of the Week from ProductHunt with over 10k page views in the first week.

▶ Terraria

neesh.ilioslabs.dev/projects/Terraria

📅 July. 2022

A simple clone of the popular game Terraria powered by **Python** and **Pygame**. The final project for a class I took at Carnegie Mellon University during Summer '22.

Education

▶ Pomperaug High School

📅 2019-2023 • 📍 Southbury, CT
